DECLARATION

I, Abhinav Gupta (RA2411003010560), student of 5th Semester, Bachelor of Technology in Computer Science and Engineering (CSE Core), SRM Institute of Science and Technology, Kattankulathur, hereby declare that the internship project titled “AI POWERED GEOSPATIAL INTELLIGENCE SYSTEM FOR SATELLITE-BASED CHANGE DETECTION, THREAT ASSESSMENT AND DECISION SUPPORT” has been carried out by me as part of my internship work.

I further declare that the work presented in this dissertation is original to the best of my knowledge and has been completed under the prescribed academic and institutional guidelines.

I also declare that the contents of this dissertation have not been submitted previously by me or, to the best of my knowledge, by any other person for the award of any degree, diploma, or similar academic qualification at any other university or institution.

Furthermore, I declare that any Intellectual Property Rights generated from this project carried out at CEMILAC, Bengaluru, shall be the property of DRDO (CEMILAC), Bengaluru. I acknowledge that I am the author of the submitted work and that the project outcomes, documents, and related intellectual contributions shall be governed by the applicable rules and policies of DRDO (CEMILAC).

ACKNOWLEDGEMENT

I would like to express my sincere gratitude to the Centre for Military Airworthiness and Certification (CEMILAC), DRDO, for providing me with the valuable opportunity to undertake this project titled **“AI-Powered Geospatial Intelligence System for Satellite-Based Change Detection, Threat Assessment, and Decision Support.”** This project has been a highly enriching learning experience and has helped me gain practical knowledge in the areas of satellite image analysis, geospatial intelligence, artificial intelligence, change detection, threat assessment, and decision-support system development.

I am deeply grateful to my project guide, **Shri Sanyasi Rao Rupiti, Scientist ‘E’**, for his constant support, valuable guidance, encouragement, and technical advice throughout the project work. His mentorship played a significant role in helping me understand the practical aspects of AI-based geospatial analysis, satellite-based monitoring, and the development of an intelligent decision-support platform for identifying and assessing changes in geospatial imagery.

I would like to thank all the officials and staff members of DRDO (CEMILAC) for their cooperation, assistance, and the knowledge they shared with me during the course of this project. Their support and professional guidance helped me gain valuable exposure to real-world defence-oriented applications of artificial intelligence and geospatial technologies.

This project has not only enriched my academic understanding but has also enhanced my confidence in applying theoretical knowledge to practical and real-world problem domains. I am truly thankful for the exposure and learning experience received at CEMILAC, which will serve as a strong foundation for my future academic and professional career.
